Commodore Builders and Leggat McCall Take Bold, Unconventional Approach to Speed Build Out of Green Offices in Record 15 Days

Watch the Project Unfold Live at www.15Days.TV

Who:

[Commodore Builders](#)

[Leggat McCall Properties](#)

[Audrey O'Hagan Architects](#)

What:

Commodore Builders, Leggat McCall Properties and Audrey O'Hagan Architects are joining forces in an unprecedented industry move this fall. The project, dubbed "15 Days," is a 10,000SF fit-out of core and shell office space, for Leggat McCall's new offices at 10 Post Office Square, Boston, MA. Commodore will build this typically 10-12 week project in a record **15** days.

Why:

Schedule inefficiencies, budget busts, outdated building technologies and status-quo construction projects are commonplace in office construction, but it doesn't have to be that way, says Eric Sheffels, President of Leggat McCall Properties. In partnership with Commodore Builders and Audrey O'Hagan Architects, Sheffels is breaking the mold this summer on the build-out of Leggat's new offices. Commodore readily accepted the challenge. This unconventional project approach is intended to demonstrate the feasibility of squeezing inefficiencies out of the procurement and implementation process, embracing new

technologies, applying green development techniques, setting aggressive benchmarks and building-in flexibility for future reconfigurations. The goal is to build smarter, better and faster.

When:

Watch the construction unfold LIVE beginning on **Monday, September 8th, 2008.**

Visit www.15Days.TV for 24/7 coverage, video clips, project blogs, team interviews, project schedule, green expert reaction, before and after photos, and comments from city officials.

Commodore's mission is to set a new standard of excellence for the delivery of construction management services to our clients. Commodore believes the quality of the construction process is as important as the quality of the construction. From project conception to preconstruction, execution, closeout and warranty service, Commodore's role is to anticipate and manage the risks inherent in construction. Commodore takes charge, so the process for clients is easy and the outcome is excellence in execution.
