Commodore Welcomes New Project Executive, Biagio DiTullio

Brings over 25 years of Experience from Boston's Prominent Educational Institutions

(Newton, MA)—Feb. 26, 2008—Commodore Builders is pleased to announce that Biagio DiTullio has joined its team as Project Executive. He brings over 25 years of commercial building experience and has completed significant projects on the campuses of Harvard University, Brown University, Emerson College, MIT, and Tufts University. DiTullio will work closely with vice president, Tom Comeau, to expand Commodore's capacity to serve the Institutional sector.

"Biagio is a heavyweight in the Institutional sector," said Comeau. "His construction knowledge, management experience and reputation will add depth to our team and will enable us to execute with excellence for our clients in this sector."

Prior to joining Commodore, DiTullio was a Project Executive at Suffolk Construction, where he managed numerous projects including the early demolition and abatement work for Emerson College's Colonial Residence Hall. In that role, he also completed three projects on the MIT campus. He managed the construction process for Harvard's Peabody Terrace façade and building envelope, as well as the construction for Brown's \$3 million bookstore renovation.

DiTullio brings a strong sense of teamwork to his new role at Commodore. "This is a people business," said DiTullio. "At the end of the day, your colleagues become your second family. I know I will be working with good, genuine people here at Commodore."

Before joining Suffolk, DiTullio spent five years at A.J. Martini, where he was a Project Executive, Vice President and Institutional Division Manager.

In addition to his higher education experience, DiTullio is no stranger to the private secondary school market. Recently, he managed construction of the Tabor Academy Math Science Building and pre-construction for the new Performance Arts Center at Thayer Academy. He additionally managed the design and construction process of two elementary schools for the Brockton Archdiocese.

DiTullio's goal is to help continue Commodore's momentum and growth within the New England Institutional market. "The institutional sector demands quality work. Buildings are constructed to last well over 100 years," he said. "It's a thrill to drive by campuses that I worked on 15 years ago and say to my children, 'Hey, I built that library'—it's awesome."

About Commodore Builders:

www.CommodoreBuilders.com

Commodore's mission is to set a new standard of excellence for the delivery of construction management services to our clients. Commodore believes the quality of the construction process is as important as the quality of the construction. From project conception to preconstruction, execution, closeout and warranty service, Commodore's role is to anticipate and manage the risks inherent in construction. Commodore takes charge, so the process for clients is easy and the outcome is excellence in execution.
